

Scanner Configurator

000019277 | Troubleshooting | Last updated 2026-09-11 | Kofax Capture, Kofax Express, Kofax Front Office Server

Overview

The Scanner Configurator lets you search for and review popular production scanner and MFP configurations for use with products. The Scanner Configurator also allows customers to search for legacy product information.

The following products have pre-configured reports available for easy access.

- [Capture](#)
- Front Office Server (MFP Support Matrix)
- Express

Note: The Scanner Configurator includes information about legacy products that are not part of the current product line-up. If you have questions about compatibility with an older application, please contact your application vendor or for more information.
