

# batch manager fails with 50 batch classes or more selected in a batch filter

000046012 | Reference | Last updated 2026-09-16 | Kofax Capture

## ISSUE

The batch manager fails with 50 batch classes or more selected in a batch filter.

With only 49 batch classes selected, the filter works, but fails with an SQL error message when selecting 50 or more batch classes.

As a workaround could be used a different logic for the filter which requires less than 50 batch classes to be selected.

This is a known bug in Tungsten Capture.

## SOLUTION

It is planned to be fixed with fix pack 2 for Tungsten Capture 11.2
