

ShareScan - CVE-2026-65927

000046015 | How To | Last updated 2026-09-16 | ShareScan

Issue

A vulnerability scan (Qualys QID 735207) reports [CVE-2026-65927](#) against the Apache Tomcat 9.0 instance installed with eCopy ShareScan. The finding is rated **Important** by the Apache Software Foundation and **Critical** by Qualys, and it is raised on any ShareScan server running Apache Tomcat 9.0.0-M1 through 9.0.120.

Customers and auditors ask whether eCopy ShareScan is exposed to this access control bypass and what remediation is required.

Cause

CVE-2026-65927 is an off-by-one error in Apache Tomcat's **RewriteValve**. The [N] (next) flag caused rule processing to restart from the second rule instead of the first. Where rewrite rules were used to enforce access control, a specially crafted request could bypass the control implemented by the first rule.

- Affected Apache Tomcat versions: 9.0.0-M1 - 9.0.120
- Fixed in Apache Tomcat: 9.0.121

Exploitation requires the RewriteValve to be explicitly declared and active, with rewrite rules in place. Tomcat does not enable the RewriteValve by default; it has to be configured manually.

Solution

eCopy ShareScan is not affected by CVE-2026-65927. No action is required.

Inspection of the shipped configuration confirms that:

- No RewriteValve declaration exists in any eCopy ShareScan server.xml
- No rewrite.config file is present in the configuration
- Tomcat does not enable the RewriteValve by default

Because the RewriteValve is neither configured nor active, the attack vector described in CVE-2026-65927 cannot be exercised against the product.

Optional: if your security policy requires the scanner finding to be cleared rather than documented as not applicable, Apache Tomcat can be updated manually to version 9.0.121. Follow the *Manual update of Apache Tomcat* article below, and confirm the target version against *ShareScan: Apache Tomcat version requirements* before updating. This is a hardening step to satisfy the scanner, not a fix required for product security.

Applies to

Product	Version	Build	Environment	Hardware
Kofax eCopy ShareScan	v6.5 - v6.6			
Tunsten eCopy ShareScan	v6.7 - v2026.3
